

MODULE - 4

Que. 1 : What are the main factors that can affect PPC bidding?

Ans. : The main factors that can affect PPC bidding :

- Your Bid & Quality: Your Max CPC (the most you'll pay) combined with your Quality Score (relevance, CTR, and landing page experience). A higher quality score can actually lower your costs.
- The Competition: The number of competitors bidding on the same keyword and the "average" price for your industry (e.g., Law and Finance are much more expensive).
- Contextual Signals: Real-time data like the user's location, device (mobile vs. desktop), time of day, and their search intent.

Que. 2 : How does a search engine calculate actual CPC?

Ans. : The Actual CPC Formula :

The actual cost is calculated by dividing the Ad Rank of the competitor below you by your own Quality Score, then adding one cent.

Actual CPC = (Ad Rank of the Competitor Below / Your Quality Score) + \$0.01

Key Components of the Calculation :

- Ad Rank: This is a score determined by multiplying your Maximum Bid by your Quality Score. It determines your position on the search results page.
- Quality Score: A metric (1-10) based on your ad's relevance, expected click-through rate (CTR), and landing page experience.

- The \$0.01 Increment: This is the minimum amount required to "outbid" the competitor directly below you.

Que. : 3 What is a quality score and why it is important for Ads?

Ans. : Quality Score is a diagnostic tool used by search engines (like Google Ads) to measure the quality and relevance of your ads, keywords, and landing pages compared to other advertisers. It is reported on a scale of 1 to 10, with 10 being the highest possible score.

Its importance can be summarized in key areas:

1. **Determines Ad Rank:** Your position is calculated as $(\text{Bid} \times \text{Quality Score})$. A high score allows you to outrank competitors even if they have a higher budget.
2. **Lowers Costs (CPC):** Quality Score acts as a discount. Because it is the denominator in the billing formula, a higher score decreases the actual amount you pay per click.
3. **Improves Ad Eligibility:** A high score makes your ad more likely to show up and allows you to use Ad Extensions (like phone numbers or extra links), which improves click-through rates.
4. **Better ROI:** By forcing ads to be relevant to the user's search, it leads to higher conversion rates and a better Return on Investment.

Que. : 4 Create an ad for your website/ blog in Google Ads that display on the display network with the properly targeted audience.

Ans. :

1 :

Choose your objective

Select an objective to tailor your experience to the goals and settings that will work best for your campaign

Sales
Drive sales online, in app, by phone or in store

Leads
Get leads and other conversions by encouraging customers to take action

Website traffic
Get the right people to visit your website

App promotion
Get more installs, engagement and pre-registration for your app

Awareness and consideration
Reach a broad audience and build interest in your products or brand

Local shop visits and promotions
Drive visits to local shops, including restaurants and dealerships.

Create a campaign without guidance

Optimised targeting

Optimised targeting helps you get more viewable impressions within your budget. Google may find people beyond your targeting signals. [Learn more about targeting expansion in display campaigns](#)

☒ Use optimised targeting

With optimised targeting, you're expanding your campaign's reach to gain more viewable impressions.

Information such as your targeting signals, landing page and assets are used to find people likely to view your ad. Your targeting signals may see reduced traffic if better performance is found elsewhere.
