

Google Analytics, Search Console & Google Tag Manager

Complete Practical Guide

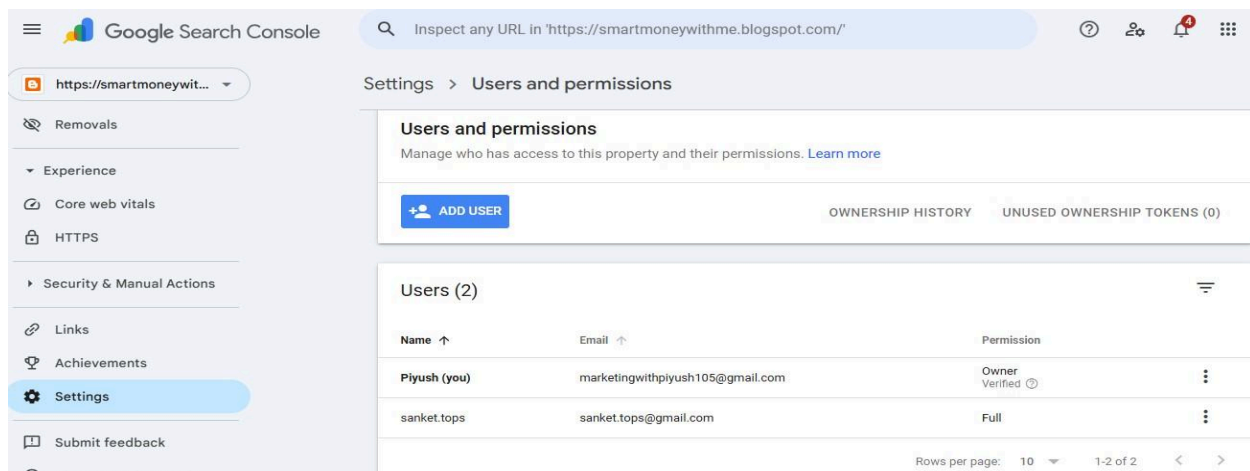

1 What Are Events?

Ans. : An event in Google Analytics (GA4) is a user interaction or occurrence on your website or app that is tracked and reported. Unlike the older Universal Analytics, in GA4 everything is an event — including page views, sessions, and user interactions.

Definition: An event is any action a user takes or any condition that occurs on your site that Google Analytics records as a data point for analysis.

2 Connect your created website and blog to search console, analytics, and google tag manager and add your faculty as a user with required permission in it.

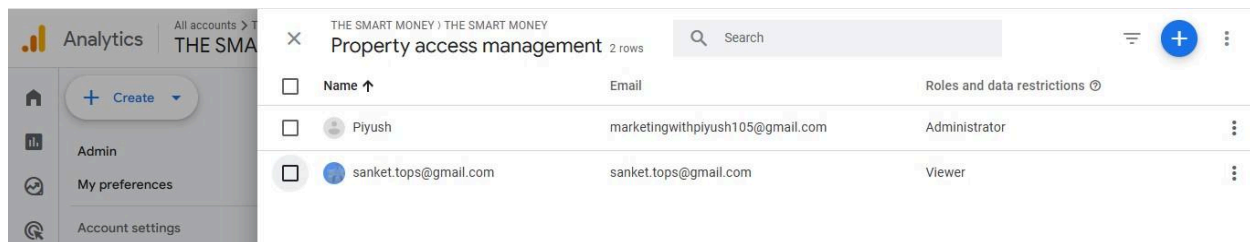

Ans. :

The screenshot shows the 'Users and permissions' page in Google Search Console. The left sidebar contains navigation links: Removals, Experience, Core web vitals, HTTPS, Security & Manual Actions, Links, Achievements, Settings (highlighted), Submit feedback, and About Search Console. The main content area is titled 'Settings > Users and permissions' and includes a search bar for 'Inspect any URL in https://smartmoneywithme.blogspot.com/'. Below this is a section for 'Users and permissions' with a description and a 'Learn more' link. There is an 'ADD USER' button and tabs for 'OWNERSHIP HISTORY' and 'UNUSED OWNERSHIP TOKENS (0)'. A table lists two users:

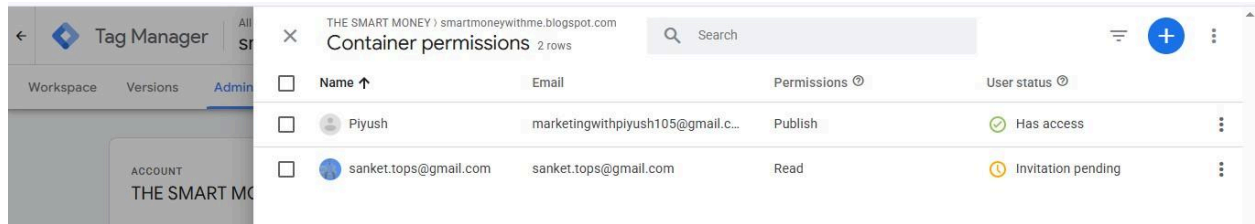

Name	Email	Permission
Piyush (you)	marketingwithpiyush105@gmail.com	Owner Verified
sanket.tops	sanket.tops@gmail.com	Full

At the bottom, it shows 'Rows per page: 10' and '1-2 of 2'.

The screenshot shows the 'Property access management' page in Google Analytics. The left sidebar contains navigation links: Analytics, All accounts > THE SMA, Admin, My preferences, and Account settings. The main content area is titled 'THE SMART MONEY > THE SMART MONEY' and includes a search bar. Below this is a table listing two users:

Name	Email	Roles and data restrictions
Piyush	marketingwithpiyush105@gmail.com	Administrator
sanket.tops@gmail.com	sanket.tops@gmail.com	Viewer

3 Submit the sitemap and robot.txt file in the search console for your website.

Ans. :

Sitemap :

Submitted sitemaps						
Sitemap	Type	Submitted ↓	Last read	Status	Discovered pages	Discovered videos
/sitemap-pages.xml	Sitemap	17 Apr 2026	17 Apr 2026	Success	1	0
/sitemap.xml	Sitemap	17 Apr 2026	17 Apr 2026	Success	7	0

Robot.txt :

```

Custom robots.txt

User-agent: * Disallow: /search Disallow: /category/ Disallow: /tag/
Allow: / Sitemap:
https://smartmoneywithme.blogspot.com/sitemap.xml Sitemap:
https://smartmoneywithme.blogspot.com/sitemap-pages.x
  
```

4 Submit the user flow and traffic source reports for your website.

Ans. :

6 Create a goal for your business and study reports whether it has been completed or not.

Ans. :

How to Create a Goal/Conversion in GA4:

A screenshot of the 'Create an event' form in Google Analytics. The form has a title 'Create an event' and buttons for 'Cancel' and 'Create'. Below the title, there is a paragraph explaining that events can be used for reporting and advertising, and that new events can be marked as key events. A link 'Learn more about event creation' is provided. The form contains two main sections: 'Provide an event name that indicates what it is being measured' with a text input field containing the word 'money', and 'Mark as key event' with a description of key events and a toggle switch that is currently turned off.

Create new events from existing events [Learn more](#)

Configuration

Custom event name 

money

Matching conditions

Create a custom event when another event matches ALL of the following conditions

Parameter	Operator	Value	
event_name	equals	page_view	×
page_location	contains (ignore case)	https://smartmoneywithme.blogspot.	×

Add condition

Choose how to create an event

- ☒ Create without code
Create an event that can be detected by your Google tag without adding any code to your website.

Summary of your new event:

Data stream

 THE SMART MONEY

Event name

money

Event criteria

event_name equals page_view page_location contains (ignore case) https://smartmoneywit...

Edit event configuration

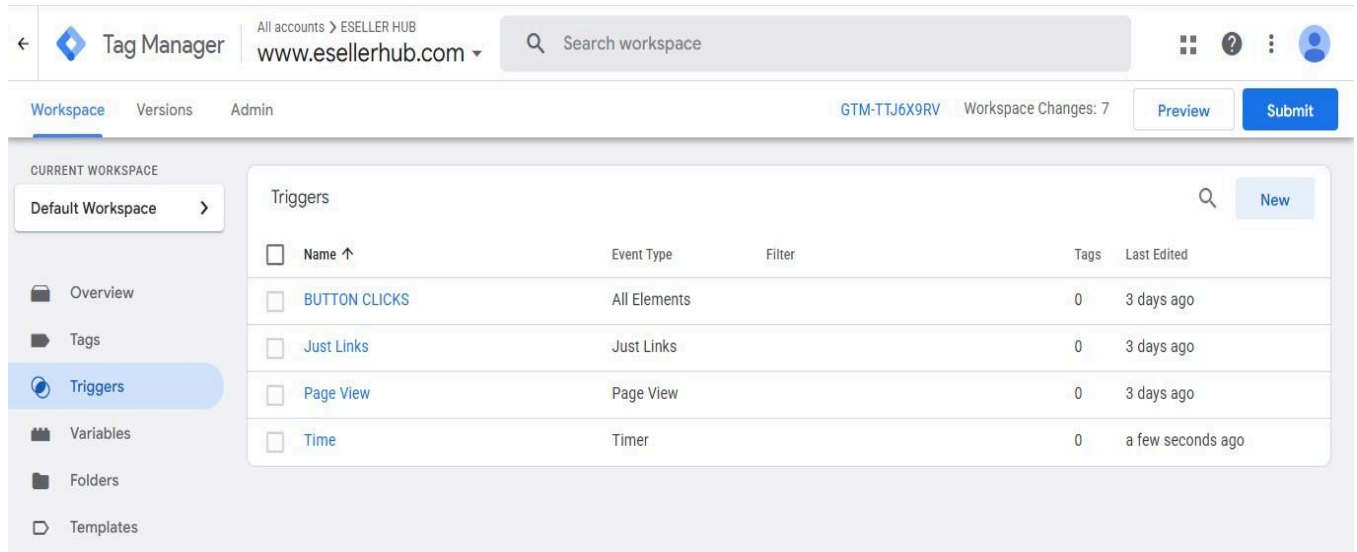

- ☐ Create with code
Provide the name and install code on your website or app to identify the event that you want to measure.
